

Real estate media built around the home.

These prices are useful benchmarks. Most homes have individual needs, so much of our work is scoped as a custom package around the property, timing, and the media that will be most useful.

THE SMALL PRINT: CONDITIONS AND DETAILS

Drone is subject to weather, airspace and FAA limitations. Every booking includes up to 20 minutes of on-site preparation: replacing accessible bulbs, tidying small clutter, moving minor distractions, light trimming of accessible branches where safe and allowed, and similar quick tasks. Additional preparation is \$25 per 15 minutes. If exceptional needs require more time or editing, we will explain the specific work and price and agree with you before shooting. AI-assisted retouching keeps the property accurate; Full and Premium use high-definition human editing. Damage, permanent features, and material facts are never concealed.
